Silver Lining

Silver Lining

A powerful solution based "in the clouds". Work where you want. How you want. Work with others on show day. Online or offline. With Main-Events.com you have everyday choices to work the way you want.

Advantages of working online – FREEDOM!

The new online *Silver Lining* version of *Just Equestrian* software means that you can access your program and data through your internet browser from multiple devices using one license. Your computer at home. The office computer. Or the show laptop.

No software installation is needed. We send you a self installing shortcut for your desktop and a login and you are in business ! Just click and go.

This is exactly the same powerful program you are used to with the desktop version of *Just Equestrian* but being online, it is more convenient. And the server will handle all your backups so you are protected in the event of computer crashes.

We have partnered with Technology Solutions in Masterton to provide a professional online service, so you can be assured security and service is state of the art and one less thing for you to worry about. Peace of mind.

BONUS - provided there is only "one" of you online at any time, you can share your program shortcut with another committee member on *their* computer giving you both access to view and work with the same data - but at different times.

Updates are automatic- no installation needed!

All program updates are done automatically for you by Main-Events staff overnight so that means you don't have to download updates and install with all the admin/permission issues that invariably involves. We do it all for you. Simple!

In our remote desktop setup, your show committee has their own folder on the server so can access archived show data from previous years at any stage. You can even store other documents related to your show – eg pdf of schedule or sponsors logos and know they are safe, secure and centrally accessed.

Support is easier!

It is easier for our support staff to help so you don't need to send data files back and forth for checking or updating. Being online also means we can work with you in real time to show you on screen how to accomplish advanced tasks.

Swap to laptop offline where internet is unavailable

One of the major advantages of the *Just Equestrian* software is that you can run a show *without* the internet. If the desktop software is loaded on your computer, you can simply copy the show data file OFF the server (internet) on to your local computer drive and carry on where you left off. No internet connection needed.

Multiple users on show day or alternative to networking

The biggest advantage of using our new *Silver Lining* is that on show day you can have another computer being used to record results or late entries to help with the workload. This will involve another "license" but check out our show day license options. It is free for most shows using online entries!

For A&P Offices, having 2 or 3 licenses to use Just Equestrian online is a very inexpensive way to "network your computers". Far less support required. No software installation or updates required. Save on expensive technicians.

New secretary? Transfer is immediate.

Easy! As there is nothing to install, we give the new secretary the desktop shortcut and a new password and they can start right away on their own computer with access to all related show documents in the ONE place.

Show committees can save money! No need to buy a show laptop when people can use their own. They don't clutter up their own computer up with show stuff so locating and copying required show files to a new secretary is a thing of the past. A change of password will change who can access the show data online.

How it works

Each show group will have their own folder on the remote server which requires a Microsoft Windows license for each user and a nominal fee for server space. This will keep your folder available for use at any stage 12 months a year and can be used to store documents related to your show – eg schedules or sponsors logos.

The license does not include a license for Office to EDIT documents online but word and excel files can be generated from *Just Equestrian*, viewed and saved back to your local computer for processing.. A full office license is not required to run *Just Equestrian* but can be purchased if needed. Email for details.

Emails are sent out using the Emailer program from within *Just Equestrian* so that you still have the ability to email individual record of entries, payment receipts and messages to groups of customers without needing a license for Microsoft Outlook on the server.
