Biosecurity and Wairarapa A&P Show Practice Policy

Wairarapa A&P Society take Biosecurity very seriously so we require our competitors to please adhere to the following rules:

- Animal wash bays **must** be sprayed down with the Virkon Disinfectant supplied before and after each stud use, and **kept clean at all times**. One stud only at a time per washbay as per the time slot agreed.
- No new cattle exhibitor can be stalled in a pen previously used by another stud exhibitor, unless all bedding has been removed and replaced with fresh bedding with all rails and flooring disinfected (fully sprayed wet) with Virkon Disinfectant.
- Unless an animal is either at the wash bay, in the ring or moving between, all animals must be kept within their stalling area at all times.
- Please do not share buckets, troughs, brushes or grooming equipment with other exhibitors.
- There will be Hand Sanitizer provided at the pavilion.
- In the interest of Biosecurity a “keep left” and “give way” to the right” approach will be taken for animals entering and exiting the stalls and using raceways’ 2-metre gap between exhibitor stalls must be adhered to at all times to the satisfaction of the Stewards.
- Any exhibitor that has cattle that require milking will need to provide their own milking system.
- All electrical equipment to have a current electrical compliance safety tag fitted.
- All exhibitors are responsible for keeping their stalls clean and tidy at all times, including dung removal. To assist with this each exhibitor will be given an area with which to store their show gear.
- There is a NO SMOKING / NO VAPING policy in the Society's Merv Renall Cattle Pavilion – it is the responsibility of entrants to remind the public of this.
- If you are requiring extra people to attend to assist you, please ensure they are fully compliant with the above Bio-Security rules.
